I'm a motivated full-stack engineer who has experience building and scaling web applications and services in various domains. With 4 years of experience with Software Engineering and development of secure and scalable applications. I consider myself a person thirsty to learn, and passionate about new challenges. Usually the hardest challenges are the ones that motivate me the most.

EXPERIENCE

XP Inc   (08/01/2021 - Presente)
Software Egineer

I work as Backend Software Engineer, in the company's Cards ecosystem that has more than 400 thousand active users. Main responsibilities consist of maintaining various .NET Microservices in a distributed architecture that communicate using Apache Kafka with Azure Event Hubs, as well as Datadog for logging and Docker for working with containerized applications.

- I actively participated in the projects:
  - XP debit card
  - Launch of Rico's credit and debit card
  - Implementation of ACL pattern to facilitate the maintenance and integration of the card ecosystem
- Using the technologies:
  - Microservices, Kafka, RabbitMQ, C#, .Net, Azure, SQL Server and MongoDB.
